

WHY SOLAR?

A SMARTER, CLEANER, BRIGHTER TOMORROW

GOVERNMENT PUSH:

Mitigating grid strain & thermal coal shortages.

THE PROBLEM:

Escalating quarterly power bills from DISCOMs.

THE SOLUTION:

On-grid rooftop solar eliminating net consumption.

MARKET POTENTIAL:

PM Surya Ghar targeting 1 Crore Indian homes.

VALUE PROPOSITION:

25+ years of zero-bill electricity & tariff immunity.

TYPES OF SOLAR & HOW IT WORKS

UNDERSTANDING SOLAR SOLUTIONS FOR A BRIGHTER TOMORROW

**OUR PRIMARY FOCUS -
100% SUBSIDY ELIGIBLE**

ON-GRID SYSTEM (Net Metered)

Direct Grid Connection:

Panels -> Inverter -> Home & Grid

Bidirectional Net Meter

measures import & export.

Zero battery cost,

zero battery maintenance.

Full PM Surya Ghar

₹78,000 subsidy eligible.

OFF-GRID SYSTEM (Battery Storage)

Panels -> Battery Bank ->
Inverter -> Home

Independent of the power grid.

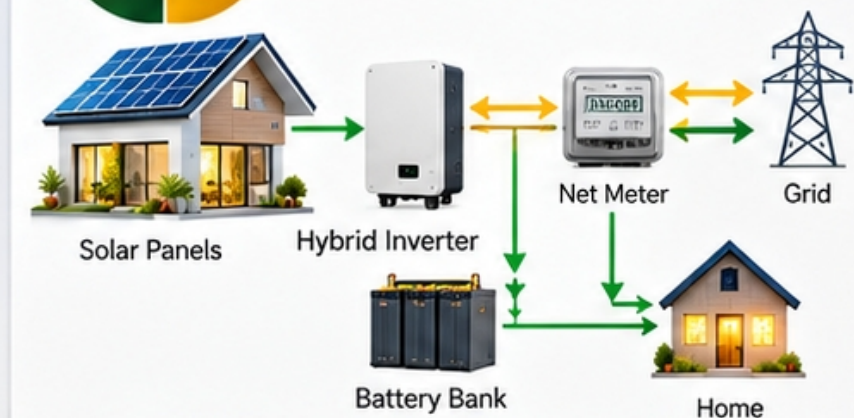

High initial cost & battery
replacement every 4-5 years.

NO central government subsidy.

HYBRID SYSTEM (Grid + Battery)

Combines net-metered grid export
with battery backup.

Highest initial equipment cost.

Ideal only for frequent
blackout zones.
